Capacities : 1 TPH, 2 TPH, 5 TPH, 7.5 TPH, 10 TPH

Used for Washing, Sponging, Waxing, Drying and Grading of products like Orange, Lemon, Tomato, Kinnow, Amla

## ROUND FRUIT CLEANING & GRADING LINE

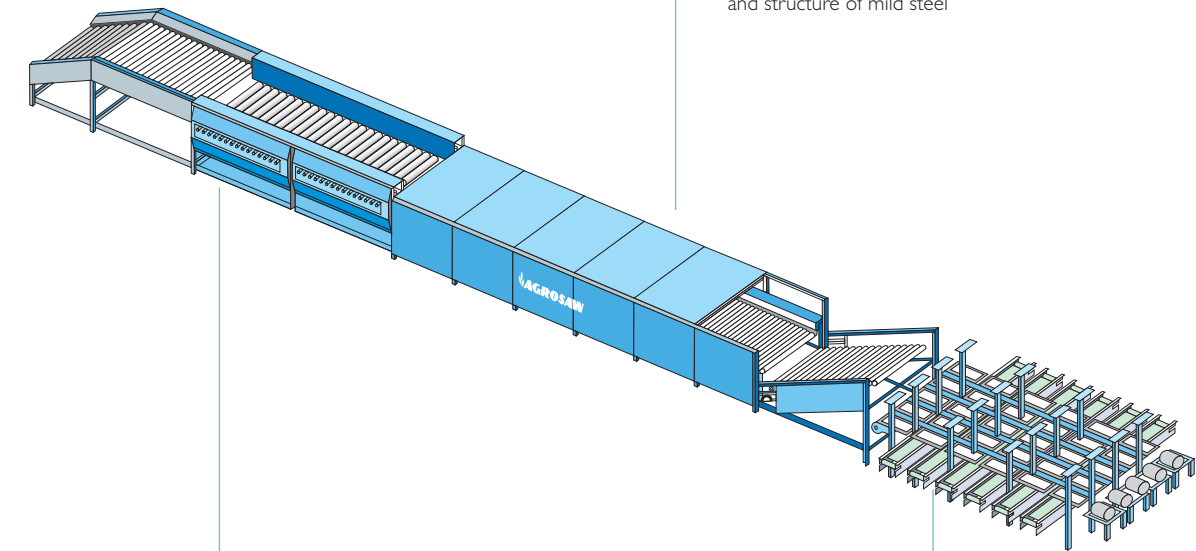

### FEEDING CUM SORTING SECTION

- Used for feeding and sorting of fruits & vegetables
- Rollers made up of PVC/Aluminum
- Contact parts made up of stainless steel & other food grade material

### DRYING SECTION

- Used for surface drying of products after application of wax
- Temperature range 30° – 50° C
- Electrical heaters with thermostatic control
- Rollers made up of PVC or aluminum
- Contact parts are made of stainless steel and structure of mild steel

### WASHING-SPONGING-WAXING SECTION

- Used for washing and cleaning of fruits & vegetables
- A number of fine pressurized water jets wash the tumbling and rolling product
- These products then pass through sponging rollers made of high absorbent sponge
- After sponging, Liquid Edible Wax is sprayed on the fruits and vegetables
- All contact parts are made up of stainless steel / food grade material

### SIZE GRADER

- Grades the product on the basis of diameter
- Product moves continuously on the belt in a single layer
- It has a series of nylon rollers hanging on top of the belt & rotating on their own axis
- Diameter of the nylon rollers differ from each other so as to create a gap between the moving belt and rotating rollers, resulting in grading of the product
- Roller and contact parts are made from food grade material and structure of mild steel
