

BUCKET ELEVATORS

For vertical conveying of free flowing granular material like grain, seeds etc.

Features

- Designed for long rugged service life and gentle handling of the material
- Heavy duty pillow block head shaft bearing
- Die pressed M.S. Buckets (other types also available)
- Self cleaning type V-shaped boot
- Inspection doors located at suitable height for servicing purpose
- Capacities calculated at water level cup for realistic capacities
- Split head cover for ease of maintenance of head section
- Optimum belt speeds, calculated to ensure proper discharge and minimum material damage
- Feed inlet hopper
- Specially designed boot pulley to eliminate any chance of material coming in between belt and pulley
- Head pulley is lugged with rubber for improved traction
- For Handling seeds, spacers are provided in between belts and buckets
- All M.S components are manufactured on CNC machines
- Different belt types are used as per different application
- Also available in G.I. construction
