

Agrosaw R150
Laboratory Seed Treater

A laboratory seed treater designed for wide variety of applications, dressing, incrustation, coating and pelleting.

The R150 is ideally suited to defining production parameters prior to production.

Features

- R150 is a laboratory seed treater designed for treating a wide range of seeds with a range of products, formulated as liquids, powders, flowable, slurries, gels, etc. It treats in batches up to 450 ml.
- The application time is manually operated and varies depending on the amount of product that is to be applied, and the type of seed to be treated.
- The R150 is provided with features to make the cleaning process more effortless. The use of air pressure is optional for each user, based on the type of seed treated at the time.
- The R150 is approved for the European CE workers safety standard.
- The Agrosaw Batch Seed Treater was the first in the market. We have since then continued the development of the batch treater and high-quality seed treatment equipment.
- Today the Agrosaw Seed Treaters have a sophisticated control system and Diaphragm pumps.
- Personal service and customization are a keystone at Agrosaw. Agrosaw delivers sophisticated Seed Treaters worldwide with personal support.
- Agrosaw seed treaters are built to last for twenty years, Thus we always keep the spare parts in stock.

TECHNICAL SPECIFICATIONS

Power Requirement	Compressed air (at 5,5 bar)	Capacity (batch volume)	RPM Rotor Speed Spinning Disc	Outlet	Weight - Width - Depth - Height	Warranties
0,37 kW	20 l/min	40-450 ml	100-500 rpm, 500-2500 rpm	Manually operated	50kg - 750mm - 420mm - 800mm	Orgalime S2012

Note: Capacities may vary depending on seed condition, moisture content, seed varieties, type & volumes of contaminants to be separated & the percentage of foreign material acceptable in the final product. Capacity also vary depending on product flow through the cleaner.

*Capacity based on wheat
